DWYER Differential Pressure Gauge | Range 0 to 30 in wc | 1/8 in NPT Female | Dual Single-Side or Back

The total static system pressure for which these gauges are intended to be used is lower. They gauge and display the pressure difference between air and compatible gases or liquids. In hospital and temporary units as well as isolation environments, the gauges are frequently used to measure pressure.

Specifications	Details
Pressure Range	0 to 30 in wc
Accuracy	Â±2.0%
Dial Size	4â□□
Connection Size	1/8"
Casing material:	Aluminum
Type	NPT

P.O Box 25898 Sharjah
United Arab Emirates
