

# Flow rate Indicator / Totalizer

with linearization, analog and pulse signal outputs

The E-Series provides unequalled safety and ease of use, opening the cover is history. The through-glass keypad enables operability without interruptions. The E-Series saves time, money and hassle and delivers user-friendliness in the toughest conditions.

#### Advantages

- Save time and gain flexibility with the easy-to-operate through glass keypad: no need to remove the front cover or to arrange a work permit.
- Intuitive "Know one, know them all!" configuration menu, saving time, cost and aggravation.
- play connectors and 1" NPT thread for flow meter mounting.
- Durable high grade stainless steel 316L Ex d enclosure for extremely salty atmospheres (offshore).

#### **Features**

- Explosion proof according ATEX, IECEx, FM and CSA c-us.
- Displays flow rate, total, acc. total, daily total, previous day total, measuring units and a flow rate indicating speedometer.
- Bright LED backlight.
- Easy K-factor configuration for volumetric or mass.
- 15 point linearization of the flow curve with interpolation.
- Ability to process all types of signals: Sine wave (coil), NAMUR, NPN/PNP pulse, Reed-switch, Active pulse signals.
- Scaled pulse output according to linearized acc. total and input retransmission.
- Loop powered 4-20mA output acc. linearized flow rate.
- Modbus RS232 / RS485 or USB communication.
- Power requirements: Loop powered, battery or 9 27V DC.
- Auto backup of settings and running totals.
- Easy configurable via PC with free downloadable software.
- Data logging of flow rate, total and accumulated total.

#### Introduction

The E112 is a popular model in our range of explosion proof flow rate indicators. The E-series distinguishes itself by its guality and functionality driven European design and manufacturing. It is more than fulfilling the rules for explosion proof design, it is about safety during the daily operation. Often, the environment is much tougher than the explosion proof requirements demand. Thus dangerous conditions may be experienced due to a broken enclosure or a poorly made flame path. Ruggedness and reliability is where Fluidwell stands for and it is now available in a comprehensive well designed and purpose driven explosion proof flow rate indicator / totalizer.

# Configuration

The E-Series uses the highly appreciated configuration structure of our F-, D- and N-Series product lines. Each setting is clearly indicated with an alphanumerical description, which avoids confusing abbreviations. Once familiar with one E-series product, you will be able to program all models in all series without a manual. For example: an (intrinsically safe) F112 operates identical to an explosion proof E112 and has the same three buttons! In other words: know one, know them all.

# Operation

Operation is done via the optical, easy-to-operate, through glass keypad without having to remove the front cover. These optical keys can be disabled. For easy handheld configuration there are three mechanical push buttons on the bottom side of the display collar when the cover is removed. All settings are accessed via a simple operator menu that can be passcode protected.

# **Display**

The unique LCD display provides multiple flow data at a glance. The main information is displayed with 7 digits (12mm, 0.47") to show total or flow rate and 11 digits (7mm, 0.28"), which can be set to show flow rate and accumulated total. Current day total (daily total) and previous day total, both non resettable are available as well. The last 15 historical day totals are stored and can be displayed. On-screen engineering units are easily configured from a comprehensive selection, while different units for flow rate and total can be displayed simultaneously. The speedometer offers a quick impression of the actual flow rate. For good readings in full sunlight and darkness, the E112 is provided with a bright backlight. When battery powered the backlight is only operational after a keypad touch, to save battery life.

# **Hazardous** areas

The E-Series has been certified according ATEX, IECEx, FM and CSA c-us with an ambient temperature of -40°C to +70°C (-40°F to +158°F). For stainless steel 40°C to +67°C (-40°F to +153°F). • The ATEX markings for gas and dust applications are:

- (Ex) II 2 G Ex db IIC T6 Gb.
- Ex II 2 D Ex tb IIIC T85°C Db.
- The IECEx markings for gas and dust applications are: Ex db IIC T6 Gb.

Ex tb IIIC T85°C Db.

• The FM and CSA c-us markings are:

XP (Explosion-proof): Class I, Division 1, Groups A, B, C, D. DIP (Dust-Ignition-proof): Class II/III, Div. 1, Groups E, F & G. Class I, Zone 1, AEx d IIc T6 Gb, Zone 21, AEx tb IIIC T85°C Db.

All info at a glance

Easy to install

Easy to program

Know one

know them all!

Reliable

#### Analog output

The linearized flow rate is transmitted with the galvanically isolated 4 - 20mA output signal. The E112 can even be loop powered via the isolated loop-current.

## **Pulse outputs**

A scaled pulse output is available according the linearized accumulated total. The unscaled pulse output retransmits the incoming pulse signal. The pulse length is user defined from 1msec up to 10 seconds. The output can be a passive NPN signal or a mechanical relay output.

#### **Power requirements**

Several power inputs are possible to power the E112 and sensor. As standard, the E112 can be loop powered via the isolated, twowire, analog output. The battery powered version with a long life lithium battery and the basic 9 - 27V DC can power the E112 including the backlight, but don't offer a real sensor supply. A real sensor supply of 8.2, 12 or 24V is optional available with type PD.

# Communication

Processed data can be read, total can be cleared and settings can be read and modified through the Modbus link (RS232 / RS485) or the local USB communication which is located at the side entry plug. Under safe conditions, the plug can be removed for easy configuration or data log extraction.

## Enclosures

Two versions of our IP66/IP67, NEMA Type4X/7/9 explosion proof enclosures are available: a solid die cast aluminum or a high grade stainless steel 316L enclosure resistant to extremely salty atmospheres (offshore). The aluminum enclosure has an industrial two component coating and is better suitable for outdoor and chemical plant applications than powder coated alternatives. A major advantage for the installation engineer is the spacious mid-chamber for the cable entry in combination with the plugand-play connectors. Especially for straight flow meter mounting a 1" NPT connection is available (see page 5 for available NPT and Metric threads sizes).

# **Remote configuration**

Even more user-friendly is the remote configuration via a PC using the free downloadable E-Series Configuration Software. Depending on your product, just connect the E-Series to your PC with the special Configuration Cable (ACE02) or use the Modbus or USB communication cables (ACE01/06/07).

# **Data logging**

The data log function can hold up to 2824 logs. Each log contains the flow rate, total, acc. total, time stamp and log number. The log interval can be user defined from every minute up to once every 24 hours. Events like cleared total, changed menu settings or factory reset can also be logged. Once the log is full it will roll over, deleting the ossldest data. The log data can be visualized on the LCD but is also easy accessible and downloadable as .CSV file via Modbus or USB communication with our free software tool.

Easy-to-operate through glass keypad

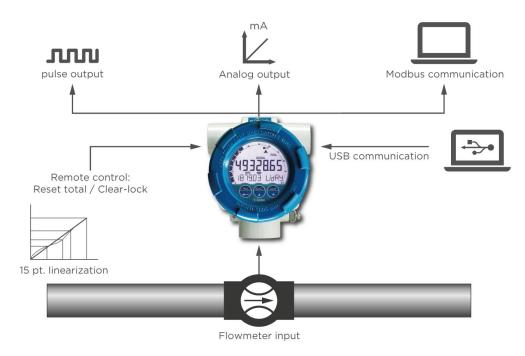

High grade Stainless Steel 316L enclosure

# **Overview application E112**

Flow measurement with mechanical flow meters where a precise calculation over the full measurement range is required. Or if retransmission of the flow rate and/or totalizer functions or serial communication is desired. The E112 offers you a flow rate indicator / totalizer designed to be used in rough and tough applications, beyond being just explosion proof. Its sturdy design and ease of use are unequaled by any other explosion proof indicator in the market! The E-Series is always your first and safest choice in explosion proof applications. For intrinsically safe applications we offer our field mount F-Series indicators.

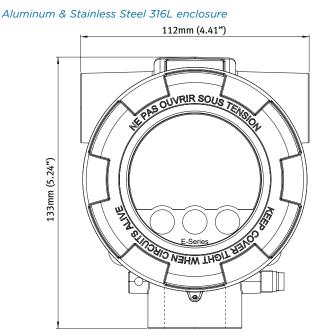

# Signal input

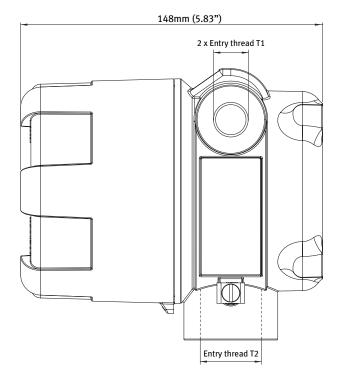

The E112 accepts most input signals for volume flow or mass flow meters. The input signal type can be selected in the configuration menu without having to adjust any sensitive mechanical dip-switches or jumpers. In addition to the average K-Factor, 15 linearization points can be entered with their frequencies or values. The unit will interpolate between these points greatly enhancing accuracy in any flow range.

Type of signal	Resistance	Low Pass filter (LP)	Max. frequency	Max. frequency Low Pass filter (LP)	Min. amplitude P-P	Remark
NPN	100kΩ pull-up	100kΩ pull-up	6kHz Threshold 1.2V	2.2kHz		Open collector
REED	1MΩ pull-up	1MΩ pull-up	1.2kHz Threshold 1.2V	120Hz

# Display

Туре	High intensity transflective numeric and		
	alphanumeric LCD, UV-resistant, with bright		
	backlight. Intensity can be adjusted via the		
	keypad.		
Note	When battery powered, the backlight is only		
	operational after a keypad touch, to extend		
	battery lifetime.		
Dimensions	Ø 65 x 45mm (2.56" x 1.77").		
Digits	Seven 12mm (0.47") and eleven 7mm (0.28")		
	digits. Various symbols and measuring units.		
Refresh rate	User definable: 8 times/sec 30 secs.		
Speedometer	To indicate the actual flow rate the bargraph runs		
	from 0 to 100% in 20 blocks, each block is 5%.		

#### Operating temperature

Ambient HA_	-40°C to +70°C (-40°F to +158°F).
Ambient HS_	-40°C to +67°C (-40°F to +153°F).

#### **Power requirements**

Туре РВ	Long life Lithium battery - life-time depends
	upon settings and configuration - up to approx.
	3 years.
Note PB	The battery can power the backlight for a short
	time after a keypad touch but cannot power
	the relay output (OR) or the real sensor supply
	(Terminal P3).
Type PD	9 - 27V DC. Consumption max. 4.5 Watt.
Туре РХ	9 - 27V DC. Consumption max. 3 Watt.
Туре АН	Loop powered, analog output. 11 - 27V DC,
	Min. 3.5mA. Consumption max. 675mW
	(25mA @ 27VDC)
Note AH	The loop powered analog output cannot power
	the backlight, mechanical relay output (OR) or
	the real sensor supply (Terminal P3).

#### **Sensor excitation**

Type AH/PB/PX	Terminal S3: 3V DC for pulse signals and 1.2V D	
	for coil pick-up, lout max. 100µA.	
Note AH/PB/PX	This is not a real sensor supply. Only suitable for	
	sensors with a very low power consumption like	
	coils (sine wave) and reed-switches.	
Type PD	Terminal P3: 8.2 / 12 / 24V DC	
	8.2V DC, I <sub>out</sub> max. 20mA.	
	12V DC, I <sub>out</sub> max. 30mA.	
	24V DC, I <sub>out</sub> max. 75mA (this voltage varies	
	depending on the input supply voltage)	

#### **Terminal connections**

Туре	Removable plug-in terminal strip. Wire max.
	1.5mm <sup>2</sup> and 2.5mm <sup>2</sup> .

#### Data protection

Data prote		
Туре	EEPROM backup of all settings. Backup of	
	running totals every minute. Data retention at	
	least 10 years.	
Password	Configuration settings and clear total can be	
	password protected.

Type H_H	Entry threads: 3 x M25	

#### **General E-Series accessories**

ACE01	USB data logging and configuration cable for
	type CU.
ACE02	Remote configuration cable for type CX.
ACE03	Stainless steel wall mounting kit
	(inc. screws+plugs).
ACE04	Stainless steel pipe mounting kit.
ACE05	2 pins, 30cm (12") cable with Amphenol
	connector.
ACE06	Remote configuration cable (1.8m/5.9ft) for
	type CH.
ACE07	Remote configuration cable (1.8m/5.9ft) for
	type CB.

# Technical specifications E112

# Signal inputs - Flowmeter

Туре Р	Coil / sine wave (HI: 20mVpp or LO: 90mVpp
	- sensitivity selectable), NPN/PNP, reed switch,
	Namur, active pulse signals 8 or 24V DC.
Frequency	Minimum OHz - maximum 10kHz for total and
	flow rate. Maximum frequency depends on signal
	type and internal low-pass filter. E.g. reed switch
	with low-pass filter: max. frequency 120Hz.
K-Factor	0.000010 - 9,999,999 with variable decimal
	position.
Low-pass filter	Available for all pulse signals.
Option ZF	coil sensitivity 10mVpp.
Option ZG	coil sensitivity 5mVpp.

#### Signal inputs - Additional input

Function	Terminal input to reset total remotely or to lock
	the "clear total" button.
Туре ІВ	Internally pulled-up switch contact - NPN.
Duration	Minimum pulse duration 100msec.

#### Signal outputs - Digital output

Function	<ul> <li>Scaled pulse output - transmitting acc. total.</li> </ul>
	• Input pulse retransmission (squared, OT only).
Frequency	Max. 500Hz. Pulse length user definable
	between 1msec up to 10 seconds.
	Retransmission: Minimum pulse duration: 50µs,
	square wave.
Type OR	One isolated electro-mechanical relay output
	(NO). Max. resistive load: 1A $@$ 250V AC / 30V
	DC. Maximum inductive load: 0,5A (pilot duty
	applications). Type OT remains also available.
<b>Restrictions OR</b>	Requires 24 - 27V DC and supplied via P5 - P6.
	Frequency max. 0.5Hz.
Туре ОТ	One passive transistor output (NPN) - not
	isolated. 300mA - 50V @ 25°C.

#### Signal outputs - Communication option

Function	Reading display info, clear total, read/write
	configuration settings and data log extraction.
Protocol	Modbus ASCII / RTU.
Туре СВ	RS232
Туре СН	RS485 2-wire
Type CU	Local USB communication for connection to a
	PC / laptop incl. Ex d USB plug at the right-hand
	side entry.
Restriction CU	Requires <sup>3</sup> / <sub>4</sub> "NPT or M25 side entry thread.
Туре СХ	No communication, remote configuration
	possible with accessory cable ACE02.

# Signal outputs - Analog output

Function	Transmitting flow rate.
Туре АН	Galvanically isolated, loop powered 4 - 20mA
	output
Accuracy	12 bit. Error 0.03% @ 20°C (Typical 45ppm/°C).
	Output signal can be scaled to any desired
	range.

# **Operator functions**

Displayed info	<ul> <li>Linearized flow rate and / or total.</li> </ul>
	<ul> <li>Linearized total and accumulated total.</li> </ul>
	<ul> <li>Current day (daily) total and previous day</li> </ul>
	• The last 15 historical day totals are stored and
	can be displayed.
	<ul> <li>Indicating speedometer for flow rate.</li> </ul>
	<ul> <li>Total can be reset to zero by pressing the</li> </ul>
	CLEAR-key twice.

#### **Remote configuration**

	garater
Function	Easy remote configuration via our free
	downloadable software and a special
	communication cable.
Туре СВ	Requires ACE07 cable with RS232 to USB plug.
Туре СН	Requires ACE06 cable with RS485 to USB plug.
Type CU	Requires ACE01 cable with mini USB to USB plug.
Туре СХ	Requires ACE02 cable for option CX to USB plug.
-	

#### Data logging

Function	Records process data over time with real time clock.
Type ZL	Each log containing flowrate, total, acc. total,
	time/date stamp and log number.
Interval logs	Every: 1 min, 5 min, 10 min, 15 min, 30 min, 1 hr, 2
	hr, 3 hr, 4 hr, 6 hr, 8 hr or disable.
	Max. 1500 interval logs.
Daily logs	Configurable time once / twice per day or
	disable. Max. 600 daily logs.
Event logs	When settings change (manual/Modbus),
	restart / power failure, factory reset, cleared
	total or error event. Max. 724 event logs.
Extraction	Via USB (CU) or Modbus communication
	(CB/CH) as .csv

#### Total

Digits	7 digits.
Units	L, m³, US gal, igal, cf, Oil bbl, kg, ton, US ton, lb
	or none.
Decimals	0 - 1 - 2 or 3.
Note	Total can be reset to zero.

#### Accumulated total

Digits	11 digits.
Units / decimals	According to selection for total.
Note	Can not be reset to zero.

#### Flow rate

Digits	7 digits.
Units	mL, L, m³, mg, g, kg, ton, US ton, US gal, igal, Oil
	bbl, lb, cf, rev, none, scf, nm³, nL or p.
Decimals	0 - 1 - 2 or 3.
Time units	/sec - /min - /hr - /day.

# Ordering information E112

	Description			
Model	E112	Flow rate Indicator / Totalizer with linearization, analog and pulse signal outputs.		
Input	Ρ	Pulse input: coil, npn, pnp, namur.		
Analog output	AH	Galvanically isolated, loop powered 4-20mA output.		
Communication	СВ	RS232 communication - Modbus ASCII / RTU.		
	СН	RS485 communication - 2wire - Modbus ASCII / RTU.		
	CU	USB communication - requires $3/4$ "NPT or M25 entry thread.		
	сх	No communication, remote configuration is possible.		
Enclosures	HA_	Die-cast aluminum Ex d enclosure.		
	HS_	Stainless steel 316L Ex d enclosure.
